FLORIDA.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Florida collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	968,470	752,619	215,851	28.7

Average acreage per farm	112.0	105.0	7.0	6.7
Average improved acreage per farm	42.5	36.1	6.4	17.7
Value of all farm property	$330,301,717	$143,183,183	$187,118,534	130.7
Land and buildings	281,449,404	118,145,989	163,303,415	138.2
Land alone	228,424,740	93,738,065	134,686,675	143.7
Buildings	53,024,664	24,407,924	28,616,740	117.2
Implements and machinery	13,551,773	4,446,007	9,105,766	204.8
Live stock	35,300,540	20,591,187	14,709,353	71.4
Average value per farm:				
All farm property	6,116	2,863	3,253	113.6
Land and buildings	5,212	2,362	2,850	120.7
Land alone	4,230	1,874	2,356	125.7
Buildings	982	488	494	101.2
Implements and machinery	251	89	162	182.0
Live stock	654	412	242	58.7
Average value per acre of land in farms:				
All farm property	54.63	27.25	27.38	100.5
Land and buildings	46.55	22.49	24.06	107.0
Land alone	37.78	17.84	19.94	111.8
Buildings	8.77	4.65	4.12	88.6
Implements and machinery	2.24	0.85	1.39	163.5
Live stock	5.84	3.92	1.92	49.0

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 519,926. For this territory, the increase in population between 1910 and 1920 was 17.8 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

FLORIDA

COUNTIES, PRINCIPAL CITIES, AND RIVERS.

EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

TABLE 2.—NUMBER OF FARMS AND FARM ACREAGE: 1850 TO 1920.

CENSUS YEAR.	FARMS.		LAND IN FARMS.				Per cent of land area in farms.	Per cent of farm land improved.

[1] Includes farmers with country of birth not reported.

FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total	38,487	35,399	3,088	8.7	100.0	100.0
Free from mortgage	25,010	29,614	−4,604	−15.5	65.0	83.7
Mortgaged	8,102	5,160	2,942	57.0	21.1	14.6
Unknown	5,375	625	4,750	760.0	14.0	1.8

[1] A minus sign (−) denotes decrease. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890
Total	38,487	35,399	28,614	23,866	100.0	100.0	100.0	100.0
Free from mortgage	25,010	29,614	24,064	23,163	65.0	83.7	84.1	97.1
Mortgaged	8,102	5,160	2,773	703	21.1	14.6	9.7	2.9
Unknown	5,375	625	1,777	.....	14.0	1.8	6.2	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	7,308	4,159	3,149	75.7
Value of land and buildings	$50,580,850	$12,884,025	$37,696,825	292.6
Amount of mortgage debt	$12,909,813	$2,709,970	$10,199,843	376.4
Ratio of debt to value, per cent	25.5	21.0	.....	.....
Average rate of interest paid, per cent	7.3	.....	.....	.....
Average value per farm	$6,921	$3,098	$3,823	123.4
Average debt per farm	$1,767	$652	$1,115	171.0
Average equity per farm	$5,155	$2,446	$2,709	110.8

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.[1]		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909
Labor	20,190	21,160	−970	−4.6	37.4	42.3
Fertilizer	28,925	29,826	−901	−3.0	53.6	59.6
Feed	20,471	16,628	3,843	23.1	37.9	33.2

[1] A minus sign (−) denotes decrease.

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE.	
	1919	1909	Amount.	Per cent.
Labor, total	$10,830,397	$5,354,376	$5,476,021	102.3
Amount in cash	10,117,531	4,992,278	5,125,253	102.7
Value of rent and board furnished	712,866	362,098	350,768	96.9
Fertilizer	10,316,929	3,609,853	6,707,076	185.8
Feed	5,024,668	1,820,356	3,204,312	176.0

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Florida the number of "dairy cows," including heifers 1 year old and over, reported for January 1,

1920, was 89,880, as compared with 116,041 "cows kept for milk" reported for April 15, 1910. This represents a decrease of 26,161, or 22.5 per cent. The number of "beef cows" reported for January 1, 1920, was 315,314, as compared with 319,181 "cows not kept for milk" reported for April 15, 1910, representing a decrease of 3,867, or 1.2 per cent. The decrease shown for dairy cows is due in part to the change in classification mentioned above.

Farms reporting domestic animals: 1910.—Horses were reported by 29,290 farms in Florida in 1910, mules by 14,443 farms, cattle by 31,551, sheep by 651, and swine by 35,593. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Florida increased from 50,016 in 1910 to 54,005 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.
Dairy cows on farms Jan. 1, 1920, total	18,268	33.8	71,641	Head	
On farms reporting milk produced	13,194	24.4	51,116	Head	
On farms not reporting milk produced	5,074	9.4	20,525	Head	
Average production of milk per dairy cow, 1919 [1]			152	Gals.	
Specified dairy products:					
Milk, as reported...1919			9,035,733	Gals.

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Florida in 1919 for which the acreage was reported was 1,235,139, which represents 53.8 per cent of the total improved land in farms (2,297,271 acres). The total crop acreage reported for 1909 was 1,220,798, or 67.6 per cent of the improved land in farms (1,805,408 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 245,685 acres of mature crops grazed or "hogged off" and 134,247 acres of velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

CROP.	FARMS REPORTING. Number. 1919	1909	Per cent of all farms. 1919	1909	ACRES HARVESTED. 1919	1909	Per cent of increase.[1]	PRODUCTION. Quantity. Unit.	1919	1909	Per cent of increase.[1]	Value. 1919	1909	Per cent of increase.[1]

Sugar cane	24,331	19,663	45.1	39.3	20,413	12,928	57.9	Tons.	179,573	142,517	26.0	4,134,458	1,089,698	279.4
Chufas	200	351	0.4	0.7	706	1,072	−34.1	Bu.	12,810	21,500	−40.4	51,240	43,470	17.9
Fruits and nuts, total												23,981,571	7,712,549	210.9
Small fruits	1,840		3.4		904	1,356	−33.3	Qts.	1,327,470	2,396,573	−44.6	414,969	302,383	37.2
Other fruits and nuts												23,566,602	7,410,166	218.0

[1] A minus sign(−)denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.
[2] Excluding 42,811 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.
[3] Less than one-tenth of 1 per cent.
[4] Oats and peas, and other combinations, grown and harvested together.
[5] Includes small quantities of sorghum seed (1919 and 1909) and of sunflower seed and velvet beans (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops, is probably a duplication of other crop acreage.
[6] Includes flower and vegetable seeds (1919 and 1909), and teosinte seed, timothy seed, and other grass seed (1909).
[7] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.
[8] Includes millet and Hungarian grass.
[9] The 1919 figures represent vegetables raised for sale only.
[10] In 1909 the value of the farm garden was largely included in the value of "other vegetables."

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	790,487	605,771	569,567	378,906	360,294
Oats	17,207	43,206	31,467	42,003	47,962
Peanuts	77,416	126,150	69,452	26,166	
Hay and forage	[1]139,516	54,763	21,994	7,661	330
Potatoes	17,525	8,509	3,752	1,218	
Sweet potatoes and yams	26,436	21,995	22,791	18,698	19,167
Cotton	110,562	263,454	221,825	227,370	245,595
Sugar cane	20,413	12,928	13,800	9,345	7,938

[1] Includes 42,811 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 96,705 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

CROP.	PER CENT OF IMPROVED LAND OCCUPIED. 1919	1909	AVERAGE YIELD PER ACRE. Unit.	1919	1909	AVERAGE VALUE PER ACRE. 1919	1909
Corn	34.4	33.6	Bu.	11.2	11.6	$17.87	$9.42
Oats	0.7	2.4	Bu.	12.9	14.0	15.50	10.26

KENTUCKY.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Kentucky collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,713,145. For this territory, the increase in population between 1910 and 1920 was 4.1 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

KENTUCKY

COUNTIES, PRINCIPAL CITIES, RIVERS, AND MOUNTAINS.

EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

[1] Includes farmers with country of birth not reported.

FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total	179,327	170,332	8,995	5.3	100.0	100.0
Free from mortgage	116,613	135,505	−18,892	−13.9	65.0	79.6
Mortgaged	40,615	33,039	7,576	22.9	22.6	19.4
Unknown	22,099	1,788	20,311	.....	12.3	1.0

[1] A minus sign (−) denotes decrease. Per cent not shown when more than 1,000. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890
Total	179,327	170,332	154,559	123,071	100.0	100.0	100.0	100.0
Free from mortgage	116,613	135,505	126,219	118,080	65.0	79.6	81.7	95.9
Mortgaged	40,615	33,039	22,574	4,991	22.6	19.4	14.6	4.1
Unknown	22,099	1,788	5,766	.....	12.3	1.0	3.7	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	35,531	25,846	9,685	37.5
Value of land and buildings	$230,557,435	$81,315,441	$149,241,994	183.5
Amount of mortgage debt	$67,116,481	$23,411,430	$43,705,051	186.7
Ratio of debt to value, per cent	29.1	28.8	.....	.....
Average rate of interest paid, per cent	6.0	.....	.....	.....
Average value per farm	$6,489	$3,146	$3,343	106.3
Average debt per farm	$1,889	$906	$983	108.5
Average equity per farm	$4,600	$2,240	$2,360	105.4

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.[1]		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909
Labor	76,953	91,642	−14,689	−16.0	28.4	35.4
Fertilizer	86,687	56,783	29,904	52.7	32.0	21.9
Feed	119,689	65,693	53,996	82.2	44.2	25.3

[1] A minus sign (−) denotes decrease.

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE.	
	1919	1909	Amount.	Per cent.
Labor, total	$18,152,309	$12,243,851	$5,908,458	48.3
Amount in cash	15,292,169	10,007,302	5,284,867	52.8
Value of rent and board furnished	2,860,140	2,236,549	623,591	27.9
Fertilizer	3,597,449	1,350,720	2,246,729	166.3
Feed	16,016,669	4,014,998	12,001,671	298.9

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Kentucky the number of "dairy cows," including heifers 1 year old and over, reported for January 1, 1920, was 514,917, as compared with 409,834 "cows

kept for milk" reported for April 15, 1910. This represents an increase of 105,083, or 25.6 per cent. The number of "beef cows" reported for January 1, 1920, was 134,680, as compared with 101,232 "cows not kept for milk" reported for April 15, 1910, representing an increase of 33,448, or 33 per cent. The percentage of increase shown for dairy cows would doubtless have been larger, except for the change in classification mentioned above, and the percentage of increase shown for beef cows correspondingly smaller.

Farms reporting domestic animals: 1910.—Horses were reported by 175,945 farms in Kentucky in 1910, mules by 97,796 farms, cattle by 220,608, sheep by 45,697, and swine by 172,846. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Kentucky increased from 259,185 in 1910 to 270,626 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.

1909			17,307	4,522

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Kentucky in 1919 for which the acreage was reported was 6,303,182, which represents 45.1 per cent of the total improved land in farms (13,975,746 acres). The total crop acreage reported for 1909 was 6,046,028, or 42.1 per cent of the improved land in farms (14,354,471 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 40,891 acres of mature crops grazed or "hogged off" and 400 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100.

[2] Excluding 931,451 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.

[3] The 1909 figures include a small quantity of emmer and spelt.

[4] Less than one-tenth of 1 per cent.

[5] Principally oats and peas grown and harvested together.

[6] Includes small quantities of sunflower seed (1919 and 1909) and of flaxseed and tobacco seed (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops is probably a duplication of other crop acreage.

[7] The total values include the value of small quantities of flower and vegetable seeds. The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.

[8] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.

[9] Includes millet and Hungarian grass.

[10] The 1919 figures represent vegetables raised for sale only.

[11] In 1909 the value of the farm garden was largely included in the value of "other vegetables."

[12] These crops comprise ginseng (1919 and 1909) and willows and hops (1909).

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	3,247,167	3,436,340	3,319,257	2,960,382	3,021,176
Oats	229,464	174,315	316,590	645,316	403,416
Wheat	839,987	681,323	1,431,027	898,694	1,160,108
Hay and forage	[1] 2,084,909	976,038	683,139	661,705	300,251
Potatoes	50,069	55,750	37,160	49,366	
Tobacco	634,038	469,795	384,805	274,587	226,120

[1] Includes 931,451 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 1,153,458 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

CROP.	PER CENT OF IMPROVED LAND OCCUPIED. 1919	1909	AVERAGE YIELD PER ACRE. Unit.	1919	1909	AVERAGE VALUE PER ACRE. 1919	1909

[1] Includes apricots, quinces, and (for 1910) mulberries. Since these fruits were not called for by the 1920 schedule, the returns for that year are somewhat incomplete.
[2] The figures for 1910 and 1909 include grapefruit, olives, and Japanese persimmons.
[3] Less than one-tenth of 1 per cent.
[4] The figures for 1910 and 1909 include almonds, and also black walnuts and several other varieties of nuts not called for by the 1920 schedule.

[1] The fact that the farm acreage shown for certain counties exceeds the total land area of the county is accounted for partly by the fact that the irregular boundaries of the counties make it difficult to compute exactly the total land area, partly by inaccurate farm surveys which exaggerate the farm acreage, and partly by the fact that the farms situated on the county line are included entirely in one county or the other.

TENNESSEE.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Tennessee collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	2,337,885	2,184,789	153,096	7.0
Rural [2]	1,726,659	1,743,744	−17,085	−1.0
Urban	611,226	441,045	170,181	38.6
Per cent rural	73.9	79.8		
Number of farms	252,774	246,012	6,762	2.7
Approximate land area of the state.....acres	26,679,680	26,679,680		
All land in farms.....acres	19,510,856	20,041,657	−530,801	−2.6

Implements and machinery	53,462,556	21,292,171	32,170,385	151.1
Live stock	173,522,135	110,706,078	62,816,057	56.7
Average value per farm:				
All farm property	4,953	2,490	2,463	98.9
Land and buildings	4,055	1,953	2,102	107.6
Land alone	3,196	1,510	1,686	111.7
Buildings	859	444	415	93.5
Implements and machinery	212	87	125	143.7
Live stock	686	450	236	52.4
Average value per acre of land in farms:				
All farm property	64.17	30.56	33.61	110.0
Land and buildings	52.53	23.98	28.55	119.1
Land alone	41.40	18.53	22.87	123.4
Buildings	11.13	5.44	5.69	104.6
Implements and machinery	2.74	1.06	1.68	158.5
Live stock	8.89	5.52	3.37	61.1

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase (or decrease) in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,697,759. For this territory, the increase in population between 1910 and 1920 was 1.7 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

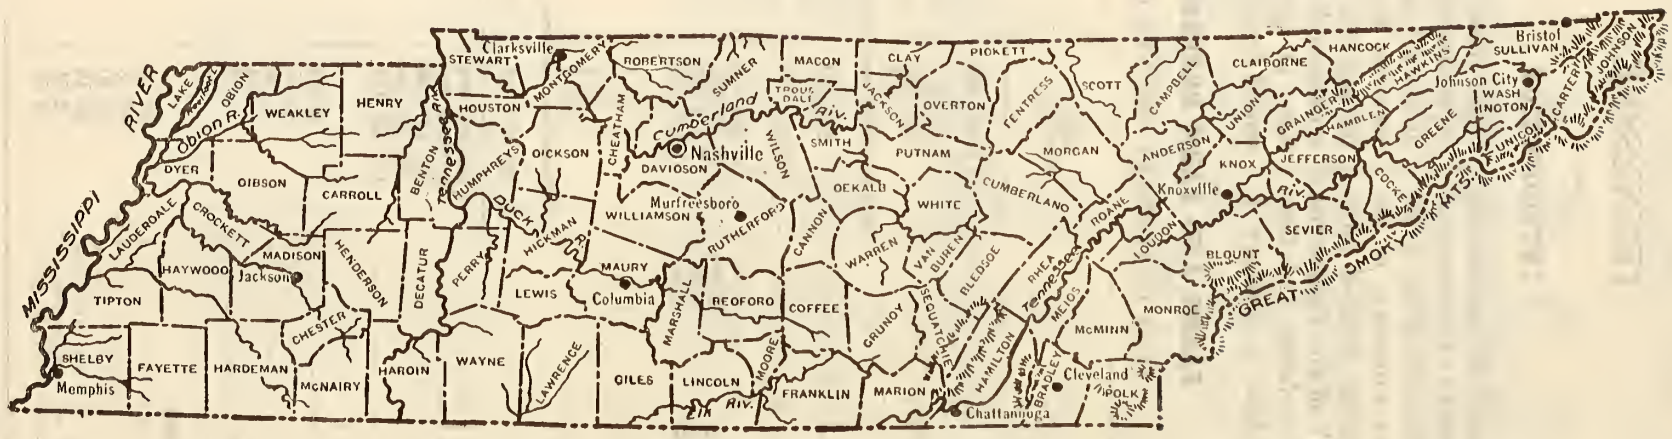
COUNTIES, PRINCIPAL CITIES, RIVERS, AND MOUNTAINS.



EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

TABLE 2.—NUMBER OF FARMS AND FARM ACREAGE: 1850 TO 1920.

TABLE 16.—NUMBER, ACREAGE, AND VALUE OF FARMS, CLASSIFIED BY NATIVITY OF WHITE FARMERS AND BY RACE OF COLORED FARMERS: 1920 AND 1910.

COLOR AND NATIVITY OR RACE.	NUMBER OF FARMS.		LAND IN FARMS, 1920 (ACRES).		Value of land and buildings, 1920
	1920	1910	Total.	Improved.	
All farmers	252,774	246,012	19,510,856	11,185,302	$1,024,979,894
White farmers	214,592	207,704	17,987,053	10,066,270	934,551,649
Native [1]	213,832	206,821	17,920,245	10,029,097	929,357,303
Foreign-born	760	883	66,808	37,173	5,194,346
Country of birth:					
Canada	48	42	6,075	2,607	294,120
England	75	110	7,922	3,757	402,060
Germany	140	248	11,062	5,815	701,120
Ireland	41	80	5,147	2,287	336,042
Italy	146	99	5,850	4,219	1,798,600
Switzerland	91	131	7,638	3,930	636,550
Other countries	219	173	23,114	14,558	1,025,854
Colored farmers	38,182	38,308	1,523,803	1,119,032	90,428,245
Negro	38,181	38,300	1,523,788	1,119,029	90,427,645
Indian	1	8	15	3	600

[1] Includes farmers with country of birth not reported, as follows: For 1920, 2,906; for 1910, 51.

TABLE 17.—NUMBER OF FARMERS, CLASSIFIED BY TENURE, COLOR, AND NATIVITY: 1920 AND 1910.

TENURE.	ALL FARMERS.		NATIVE WHITE.[1]		FOREIGN-BORN WHITE.		COLORED.	
	1920	1910	1920	1910	1920	1910	1920	1910
Total	252,774	246,012	213,832	206,821	760	883	38,182	38,308
Owners	148,082	144,125	137,644	132,710	598	715	9,840	10,700
Managers	807	826	748	764	6	11	53	51
Tenants	103,885	101,061	75,440	73,347	156	157	28,289	27,557

[1] Includes farmers with country of birth not reported.

FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total	148,082	144,125	3,957	2.7	100.0	100.0
Free from mortgage	105,128	118,285	−13,157	−11.1	71.0	82.1
Mortgaged	32,264	24,006	8,258	34.4	21.8	16.7
Unknown	10,690	1,834	8,856	482.9	7.2	1.3

[1] A minus sign (−) denotes decrease. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890
Total	148,082	144,125	132,731	106,777	100.0	100.0	100.0	100.0
Free from mortgage	105,128	118,285	112,638	103,346	71.0	82.1	84.9	96.8
Mortgaged	32,264	24,006	14,699	3,431	21.8	16.7	11.1	3.2
Unknown	10,690	1,834	5,394	.....	7.2	1.3	4.1	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	27,496	17,362	10,134	58.4
Value of land and buildings	$159,000,504	$47,232,059	$111,768,445	236.6
Amount of mortgage debt	$49,836,266	$12,626,330	$37,209,936	294.7
Ratio of debt to value, per cent	31.3	26.7	.....	.....
Average rate of interest paid, per cent	6.2	.....	.....	.....
Average value per farm	$5,783	$2,720	$3,063	112.6
Average debt per farm	$1,812	$727	$1,085	149.2
Average equity per farm	$3,970	$1,993	$1,977	99.2

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures, it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.[1]		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909
Labor	70,494	88,670	−18,176	−20.5	27.9	36.0
Fertilizer	84,827	53,498	31,329	58.6	33.6	21.7
Feed	100,074	70,212	29,862	42.5	39.6	28.5

[1] A minus sign (−) denotes decrease.

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in this bulletin are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Tennessee the number of "dairy cows," including heifers 1 year old and over, reported for January 1, 1920, was 494,723, as compared with 397,104 "cows

kept for milk" reported for April 15, 1910. This represents an increase of 97,619, or 24.6 per cent. The number of "beef cows" reported for January 1, 1920, was 159,718, as compared with 119,718 "cows not kept for milk" reported for April 15, 1910, representing an increase of 40,000, or 33.4 per cent. "Dairy cows" constituted 75.6 per cent of all cows reported in 1920, as compared with 76.8 per cent for "cows kept for milk" in 1910. The reduction in this percentage is no doubt due to the change in classification mentioned above and does not indicate a decline in the relative importance of the dairy industry.

Farms reporting domestic animals: 1910.—Horses were reported by 153,838 farms in Tennessee in 1910, mules by 123,887 farms, cattle by 209,990, sheep by 29,987, and swine by 181,844. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Tennessee increased from 246,012 in 1910 to 252,774 in 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows. For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms. Data for these items will be tabulated later.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Tennessee in 1919 for which the acreage was reported was 6,786,187, which represents 60.7 per cent of the total improved land in farms (11,185,302 acres). The total crop acreage reported for 1909 was 6,360,928, or 58.4 per cent of the improved land in farms (10,890,484 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 107,553 acres of mature crops grazed or "hogged off," and 170 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop, but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

Fruits and nuts, total												7,888,912	4,486,261	75.8
Small fruits	18,805		6.6		12,544	12,539	(1)	Qts..	14,620,173	13,895,433	5.2	2,552,651	923,613	176.4
Other fruits and nuts												5,336,261	3,562,608	49.8

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.
[2] Excluding 293,227 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.
[3] Includes small quantities of emmer and spelt (1919 and 1909) and of rough rice (1919).
[4] Less than one-tenth of 1 per cent.
[5] Principally wheat and oats, oats and peas, and oats and barley grown and harvested together.
[6] Includes small quantities of sorghum seed and sunflower seed (1919 and 1909), of flaxseed and mustard seed (1919), and of broom-corn seed (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops, is probably a duplication of other crop acreage.
[7] The total values include the value of small quantities of flower and vegetable seeds. The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.
[8] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.
[9] Includes millet and Hungarian grass.
[10] The 1919 figures represent vegetables raised for sale only.
[11] In 1909 the value of the farm garden was largely included in the value of "other vegetables."
[12] These crops include ginseng and hops (1919 and 1909), willows (1919), and hemp (1909).

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	3,301,075	3,146,348	3,374,574	2,791,324	2,904,873
Oats	162,417	342,086	235,313	588,138	468,566
Wheat	684,497	619,861	1,426,112	877,361	1,196,563
Hay and forage	[1]1,751,123	1,060,480	645,617	571,553	191,651
Cotton	807,770	787,516	623,137	747,471	722,562
Tobacco	138,561	90,468	71,849	51,471	41,532

[1] Includes 293,227 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 1,457,896 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

Pecans	877	395	0.3	0.2	7,002	3,309

[1] Includes apricots, quinces, and (for 1910) mulberries. Since these fruits were not specifically called for by the 1920 schedule, the returns for that year are somewhat incomplete.
[2] Figures for 1910 include oranges, lemons, and Japanese persimmons.
[3] Less than one-tenth of 1 per cent.
[4] Includes almonds and Persian or English walnuts, and also, for 1910 only, black walnuts and several other varieties of nuts not called for by the 1920 schedule.

[2] The fact that the farm acreage shown for certain counties exceeds the total land area of the county is accounted for partly by the fact that the irregular boundaries of the counties make it difficult to compute exactly the total land area, partly by inaccurate farm surveys which exaggerate the farm acreage, and partly by the fact that farms situated on the county line are included entirely in one county or the other.

COUNTY TABLE I.—FARMS AND FARM PROPERTY, 1920,

		Houston.	Humphreys.	Jackson.	Jefferson.	Johnson.	Knox.	Lake.	Lauderdale.[1]	Lawrence.

[1] Part of Wayne County annexed to Perry County in 1909.

[2] The correction of errors discovered after the 1900 census reports were published would make the farm acreage for Union County 140,932.

ALABAMA.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Alabama collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

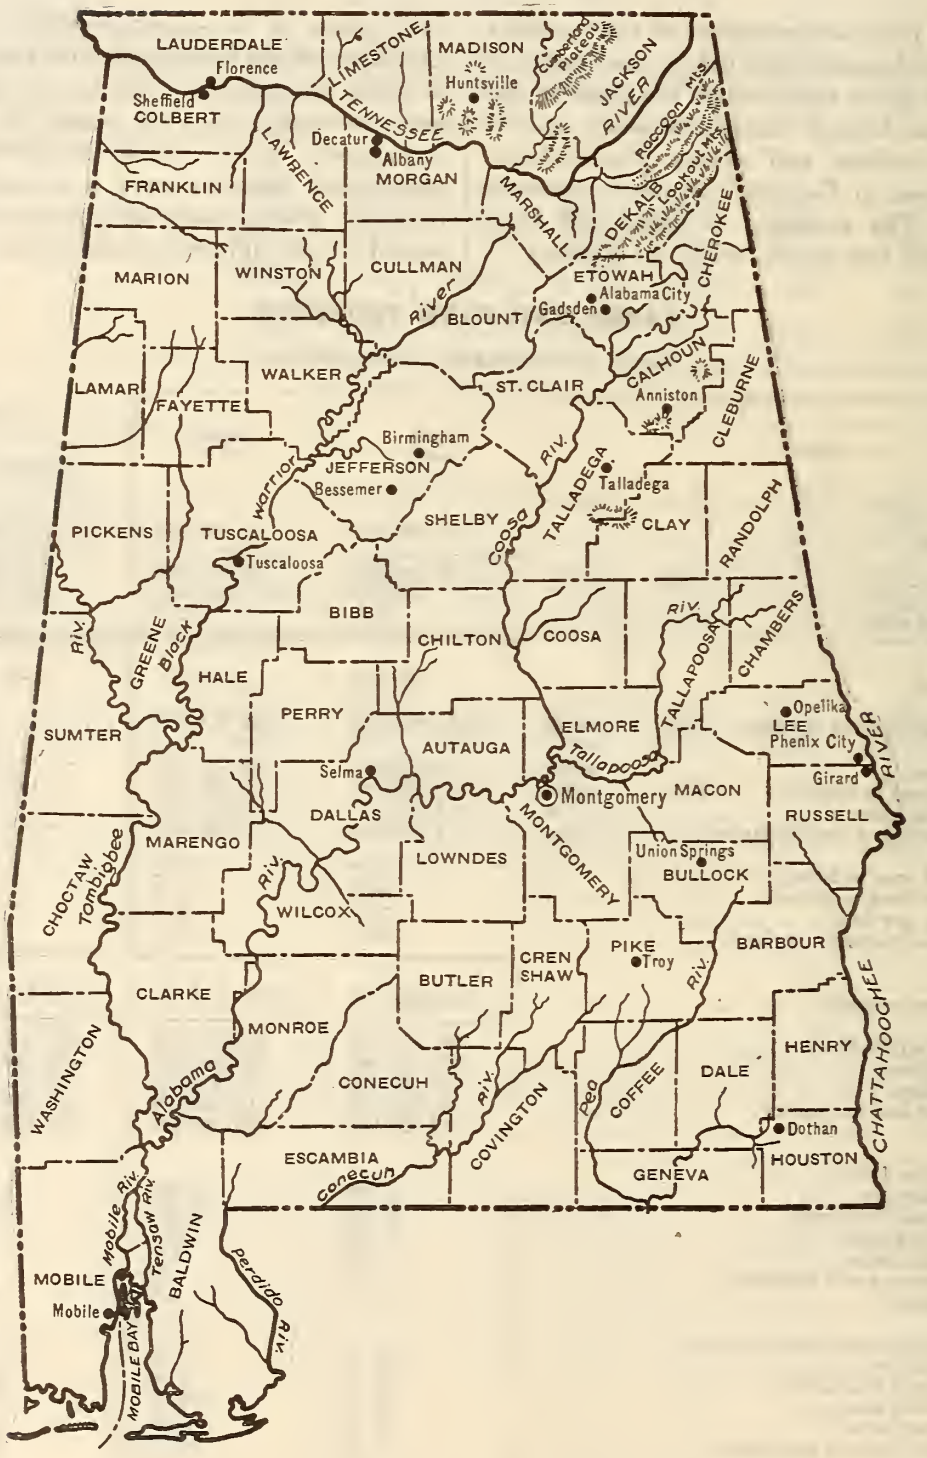
ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1] Amount.	INCREASE.[1] Per cent.
Population, total	2,348,174	2,138,093	210,081	9.8
Rural [2]	1,838,857	1,767,662	71,195	4.0
Urban	509,317	370,431	138,886	37.5
Per cent rural	78.3	82.7		
Number of farms	256,099	262,901	−6,802	−2.6
Approximate land area of the state.....acres	32,818,560	32,818,560		
All land in farms.....acres	19,576,856	20,732,312	−1,155,456	−5.6
Improved land in farms.....acres	9,893,407	9,693,581	199,826	2.1
Woodland in farms.....acres	8,301,177	9,444,764	−1,143,587	−12.1
Other unimproved land in farms.....acres	1,382,272	1,593,967	−211,695	−13.3
Per cent of land area in farms	59.7	63.2		
Per cent of farm land improved	50.5	46.8		
Average acreage per farm	76.4	78.9	−2.5	−3.2
Average improved acreage per farm	38.6	36.9	1.7	4.6
Value of all farm property	$690,848,720	$370,138,429	$320,710,291	86.6
Land and buildings	543,657,755	288,253,591	255,404,164	88.6
Land alone	415,763,862	216,944,175	198,819,687	91.6
Buildings	127,893,893	71,309,416	56,584,477	79.4
Implements and machinery	34,366,217	16,290,004	18,076,213	111.0
Live stock	112,824,748	65,594,834	47,229,914	72.0
Average value per farm:				
All farm property	2,698	1,408	1,290	91.6
Land and buildings	2,123	1,096	1,027	93.7
Land alone	1,623	825	798	96.7
Buildings	499	271	228	84.1
Implements and machinery	134	62	72	116.1
Live stock	441	250	191	76.4
Average value per acre of land in farms:				
All farm property	35.29	17.85	17.44	97.7
Land and buildings	27.77	13.90	13.87	99.8
Land alone	21.24	10.46	10.78	103.1
Buildings	6.53	3.44	3.09	89.8
Implements and machinery	1.76	0.79	0.97	122.8
Live stock	5.76	3.16	2.60	82.3

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,741,656. For this territory, the increase in population between 1910 and 1920 was 5.6 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

ALABAMA

COUNTIES, PRINCIPAL CITIES, RIVERS, AND MOUNTAINS.



EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

TABLE 2.—NUMBER OF FARMS AND FARM ACREAGE: 1850 TO 1920.

CENSUS YEAR.	FARMS.		LAND IN FARMS.					
			All land.		Improved land.		Per cent of land area in farms.	Per cent of farm land improved.

[1] Includes farmers with country of birth not reported.

FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total	107,089	103,929	3,160	3.0	100.0	100.0
Free from mortgage	64,498	74,504	−10,006	−13.4	60.2	71.7
Mortgaged	27,854	27,457	397	1.4	26.0	26.4
Unknown	14,737	1,968	12,769	648.8	13.8	1.9

[1] A minus sign (−) denotes decrease. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890
Total	107,089	103,929	91,639	71,929	100.0	100.0	100.0	100.0
Free from mortgage	64,498	74,504	70,438	68,798	60.2	71.7	76.9	95.6
Mortgaged	27,854	27,457	16,785	3,131	26.0	26.4	18.3	4.4
Unknown	14,737	1,968	4,416	.....	13.8	1.9	4.8	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	24,748	19,230	5,518	28.7
Value of land and buildings	$81,888,501	$32,311,461	$49,577,040	153.4
Amount of mortgage debt	$29,103,101	$10,350,577	$18,752,524	181.2
Ratio of debt to value, per cent	35.5	32.0	.....	.....
Average rate of interest paid, per cent	7.5	.....	.....	.....
Average value per farm	$3,309	$1,680	$1,629	97.0
Average debt per farm	$1,176	$538	$638	118.6
Average equity per farm	$2,133	$1,142	$991	86.8

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures, it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.[1]		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909
Labor	57,308	83,643	−26,335	−31.5	22.4	31.8
Fertilizer	175,407	163,241	12,166	7.5	68.5	62.1
Feed	71,668	81,275	−9,607	−11.8	28.0	30.9

[1] A minus sign (−) denotes decrease.

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE.[1]	
	1919	1909	Amount.	Per cent
Labor, total	$7,724,138	$7,454,748	$269,390	3.6
Amount in cash	6,588,966	6,033,123	555,843	9.2
Value of rent and board furnished	1,135,172	1,421,625	−286,453	−20.1
Fertilizer	14,066,108	7,630,952	6,435,156	84.3
Feed	5,920,837	4,041,486	1,879,351	46.5

[1] A minus sign (−) denotes decrease.

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Alabama the number of "dairy cows," including heifers 1 year old and over, reported for January 1,

1920, was 491,163, as compared with 391,536 "cows kept for milk" reported for April 15, 1910. This represents an increase of 99,627, or 25.4 per cent, notwithstanding the change in classification indicated above. The number of "beef cows" reported for January 1, 1920, was 170,467, as compared with 146,354 "cows not kept for milk" reported for April 15, 1910, representing an increase of 24,113, or 16.5 per cent.

Farms reporting domestic animals: 1910.—Horses were reported by 91,508 farms in Alabama in 1910, mules by 155,673 farms, cattle by 212,231, sheep by 6,628, and swine by 190,251. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Alabama decreased from 262,901 in 1910 to 256,099 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

CLASS.	FARMS REPORTING.		ANIMALS.		
	Number.	Per cent of all farms.	Number.	Value.	Average value.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound, secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.
Dairy cows on farms Jan. 1, 1920, total	185,481	72.4	394,112	Head..

1909			50,043	11,889

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Alabama in 1919 for which the acreage was reported was 7,265,035, which represents 73.4 per cent of the total improved land in farms (9,893,407 acres). The total crop acreage reported for 1909 was 7,202,040, or 74.3 per cent of the improved land in farms (9,693,581 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 194,119 acres of mature crops grazed or "hogged off" and 336,292 acres of velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

CROP.	FARMS REPORTING. Number. 1919	1909	Per cent of all farms. 1919	1909	ACRES HARVESTED. 1919	1909	Per cent of increase[1]	PRODUCTION. Quantity. Unit.	1919	1909	Per cent of increase[1]	Value. 1919	1909	Per cent of increase[1]

Sugar cane	56,604	61,226	22.1	23.3	25,302	27,211	−7.0	Tons.	208,342	226,634	−8.1	4,228,902	1,527,166	176.9
Broom corn	825	115	0.3	(3)	295	52		Lbs.	57,522	17,910	221.2	2,705	1,562	73.2
Sundry minor crops[10]					47	84						2,758	3,216	−14.2
Fruits and nuts, total												4,297,845	2,189,387	96.3
Small fruits	6,762		2.6		1,477	1,232	19.9	Qts.	2,125,418	1,907,193	11.4	420,799	165,386	154.4
Other fruits and nuts												3,877,046	2,024,001	91.6

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.
[2] Excluding 163,508 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.
[3] Less than one-tenth of 1 per cent.
[4] The 1909 figures include small quantities of sunflower seed and velvet beans. A considerable part of the acreage in soy beans, peas, and possibly some other crops, is probably a duplication of other crop acreage.
[5] The 1909 figures include small quantities of flower and vegetable seeds (value only) and of "other grass seed." The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.
[6] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.
[7] Includes millet and Hungarian grass.
[8] The 1919 figures represent vegetables raised for sale only.
[9] In 1909 the value of the farm garden was largely included in the value of "other vegetables."
[10] These crops comprise chufas (1919 and 1909), ginseng (value only, 1909), and hops (1909).

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	3,334,204	2,572,968	2,743,360	2,127,302	2,055,929
Oats	85,398	257,276	216,873	344,788	324,628
Peanuts	334,239	100,609	78,878	23,955	
Hay and forage	[1] 705,279	240,386	85,353	39,993	12,916
Sweet potatoes and yams	90,868	66,613	50,865	56,650	43,256
Cotton	2,628,154	3,730,482	3,202,135	2,761,165	2,330,086

[1] Includes 163,508 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, in order to make the 1919 figures more closely comparable with those for earlier years, the remaining area in hay and forage will be 541,771 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

CROP.	PER CENT OF IMPROVED LAND OCCUPIED. 1919	1909	AVERAGE YIELD PER ACRE. Unit.	1919	1909	AVERAGE VALUE PER ACRE. 1919	1909

[1] Includes apricots, quinces, and (for 1910) mulberries. Since these fruits were not specifically called for by the 1920 schedule, the returns for that year are somewhat incomplete.
[2] Includes lemons, kumquats, and (for 1910) olives and bananas.
[3] Less than one-tenth of 1 per cent.
[4] The figures for 1910 and 1909 include black walnuts and several other varieties of nuts which were not called for by the 1920 schedule.

MISSISSIPPI.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Mississippi collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	1,790,618	1,797,114	−6,496	−0.4
Rural [2]	1,550,497	1,589,803	−39,306	−2.5
Urban	240,121	207,311	32,810	15.8
Per cent rural	86.6	88.5		
Number of farms	272,101	274,382	−2,281	−0.8
Approximate land area of the state—acres	29,671,680	29,671,680		
All land in farms—acres	18,196,979	18,557,533	−360,554	−1.9
Improved land in farms—acres	9,325,677	9,008,310	317,367	3.5
Woodland in farms—acres	7,014,898	7,883,558	−868,660	−11.0
Other unimproved land in farms—acres	1,856,404	1,665,665	190,739	11.5
Per cent of land area in farms	61.3	62.5		
Per cent of farm land improved	51.2	48.5		
Average acreage per farm	66.9	67.6	−0.7	−1.0
Average improved acreage per farm	34.3	32.8	1.5	4.6
Value of all farm property	$964,751,855	$426,314,634	$538,437,221	126.3
Land and buildings	789,896,778	334,162,289	455,734,489	136.4
Land alone	641,842,394	254,002,289	387,840,105	152.7
Buildings	148,054,384	80,160,000	67,894,384	84.7
Implements and machinery	39,881,256	16,905,312	22,975,944	135.9
Live stock	134,973,821	75,247,033	59,726,788	79.4
Average value per farm:				
All farm property	3,546	1,554	1,992	128.2
Land and buildings	2,903	1,218	1,685	138.3
Land alone	2,359	926	1,433	154.8
Buildings	544	292	252	86.3
Implements and machinery	147	62	85	137.1
Live stock	496	274	222	81.0
Average value per acre of land in farms:				
All farm property	53.02	22.97	30.05	130.8
Land and buildings	43.41	18.01	25.40	141.0
Land alone	35.27	13.69	21.58	157.6
Buildings	8.14	4.32	3.82	88.4
Implements and machinery	2.19	0.91	1.28	140.7
Live stock	7.42	4.05	3.37	83.2

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase (or decrease) in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,584,367. For this territory, the population shows a decrease between 1910 and 1920 amounting to 2.1 per cent, which percentage indicates the rate of decline in the rural population, leaving out of consideration the changes in classification of territory.

MISSISSIPPI

COUNTIES, PRINCIPAL CITIES, AND RIVERS.

EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

[1] A minus sign (−) denotes decrease.

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Mississippi the number of "dairy cows," including heifers 1 year old and over, reported for January 1,

1920, was 530,274, as compared with 429,587 "cows kept for milk" reported for April 15, 1910. This represents an increase of 100,687, or 23.4 per cent. The number of "beef cows" reported for January 1, 1920, was 261,682, as compared with 138,930 "cows not kept for milk" reported for April 15, 1910, representing an increase of 122,752, or 88.4 per cent. The percentage of increase in the number of beef cows would have been much smaller except for the change in classification mentioned above, and the increase in the number of dairy cows somewhat larger.

Farms reporting domestic animals: 1910.—Horses were reported by 128,650 farms in Mississippi in 1910, mules by 147,852 farms, cattle by 195,338, sheep by 5,727, and swine by 193,529. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Mississippi decreased from 274,382 in 1910 to 272,101 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows sometime during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.
Dairy cows on farms Jan. 1, 1920, total	159,038	58.4	427,406	Head	
On farms reporting milk produced	126,100	46.3	354,736	Head

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Mississippi in 1919 for which the acreage was reported was 6,359,385, which represents 68.2 per cent of the total improved land in farms (9,325,677 acres). The total crop acreage reported for 1909 was 6,158,147, or 68.4 per cent of the improved land in farms (9,008,310 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 27,202 acres of mature crops grazed or "hogged off" and 81,691 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.

[2] Excluding 29,497 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.

[3] Includes small quantities of mixed crops (1919) and of emmer and spelt and barley (1909).

[4] Less than one-tenth of 1 per cent.

[5] Includes small quantities of sorghum seed (1919 and 1909) and of velvet beans (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops is probably a duplication of other crop acreage.

[6] The 1909 figures include small quantities of flower and vegetable seeds (value only), timothy seed, "other grass seed," and millet seed. The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.

[7] Corn cut for forage was not reported to any extent in 1909; hence no close comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.

[8] Includes millet and Hungarian grass.

[9] The 1919 figures represent vegetables raised for sale only.

[10] In 1909 the value of the farm garden was largely included in the value of "other vegetables."

[11] These crops comprise chufas (1919 and 1909), hemp (1919), and ginseng (value only, 1909).

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	2,657,009	2,172,612	2,276,313	1,706,352	1,570,550
Oats	53,088	97,085	87,066	133,361	198,497
Dry peas	59,233	73,090	69,490	.....	.....
Peanuts	16,933	13,997	5,853	1,960	.....
Hay and forage	[1]483,544	231,056	99,261	66,159	9,319
Sweet potatoes and yams	69,394	56,045	38,169	44,188	41,874
Cotton	2,948,387	3,400,210	2,897,920	2,883,278	2,106,215

[1] Includes 29,497 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 454,047 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

CROP.	PER CENT OF IMPROVED LAND OCCUPIED. 1919	1909	AVERAGE YIELD PER ACRE. Unit.	1919	1909	AVERAGE VALUE PER ACRE. 1919	1909

ARKANSAS.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Arkansas collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	1,752,204	1,574,449	177,755	11.3

Woodland in farms.....acres	7,396,028	8,511,510	−1,115,482	−13.1
Other unimproved land in farms.....acres	850,166	828,311	21,855	2.6
Per cent of land area in farms	51.9	51.8		
Per cent of farm land improved	52.8	46.4		
Average acreage per farm	75.0	81.1	−6.1	−7.5
Average improved acreage per farm	39.6	37.6	2.0	5.3
Value of all farm property	$924,395,483	$400,089,303	$524,306,180	131.0
Land and buildings	753,110,666	309,166,813	443,943,853	143.6
Land alone	607,773,440	246,021,450	361,751,990	147.0
Buildings	145,337,226	63,145,363	82,191,863	130.2
Implements and machinery	43,432,237	16,864,198	26,568,039	157.5
Live stock	127,852,580	74,058,292	53,794,288	72.6
Average value per farm:				
All farm property	3,974	1,864	2,110	113.2
Land and buildings	3,238	1,440	1,798	124.9
Land alone	2,613	1,146	1,467	128.0
Buildings	625	294	331	112.6
Implements and machinery	187	79	108	136.7
Live stock	550	345	205	59.4
Average value per acre of land in farms:				
All farm property	52.95	22.97	29.98	130.5
Land and buildings	43.14	17.75	25.39	143.0
Land alone	34.82	14.13	20.69	146.4
Buildings	8.33	3.63	4.70	129.5
Implements and machinery	2.49	0.97	1.52	156.7
Live stock	7.32	4.25	3.07	72.2

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,343,586. For this territory, the increase in population between 1910 and 1920 was 8.8 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

ARKANSAS

Counties, Principal Cities, Rivers, and Mountains.

EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

Fertilizer	2,572,678	596,553	1,976,125	331.3
Feed	17,725,489	4,275,587	13,449,902	314.6

[1] A minus sign (−) denotes decrease.

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Arkansas the number of "dairy cows," including heifers 1 year old and over, reported for January 1,

1920, was 516,689, as compared with 425,793 "cows kept for milk" reported for April 15, 1910. This represents an increase of 90,896, or 21.3 per cent. The number of "beef cows" reported for January 1, 1920, was 163,309, as compared with 146,199 "cows not kept for milk" reported for April 15, 1910, representing an increase of 17,110, or 11.7 per cent.

Farms reporting domestic animals: 1910.—Horses were reported by 124,393 farms in Arkansas in 1910, mules by 110,014 farms, cattle by 167,494, sheep by 8,397, and swine by 157,209. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Arkansas increased from 214,678 in 1910 to 232,604 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production, and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.
Dairy cows on farms Jan. 1, 1920, total	150,174	64.6	415,507	Head	
On farms reporting milk produced	123,129	52.9	355,260	Head	
On farms not reporting milk produced	27,045	11.6	60,247	Head	
Average production of milk per dairy cow, 1919 [1]			190	Gals.	
Specified dairy products:					
Milk, as reported...1919			76,176,721	Gals.	
1909			83,081,875	Gals.	
Increase, 1909–1919 [2]			−6,905,154	Gals.	
Per cent of increase [2]			−8.3		
Total production of milk, including estimates...1919			87,623,651	Gals.

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Arkansas in 1919 for which the acreage was reported was 6,464,540, which represents 70.2 per cent of the total improved land in farms (9,210,556 acres). The total crop acreage reported for 1909 was 5,375,930, or 66.6 per cent of the improved land in farms (8,076,254 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 26,457 acres of mature crops grazed or "hogged off" and 4,236 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

CROP.	FARMS REPORTING. Number. 1919	1909	Per cent of all farms. 1919	1909	ACRES HARVESTED. 1919	1909	Per cent of increase.[1]	PRODUCTION. Quantity. Unit.	1919	1909	Per cent of increase.[1]	Value. 1919	1909	Per cent of increase.

Other fruits and nuts												16,790,725	3,142,891	434.2

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.

[2] Excluding 147,376 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.

[3] Less than one-tenth of 1 per cent.

[4] Principally oats and peas grown and harvested together.

[5] The 1909 figures include a small quantity of flaxseed. A considerable part of the acreage in soy beans, peas, and possibly some other crops, is probably a duplication of other crop acreage.

[6] Includes small quantities of timothy seed and millet seed (1919 and 1909), and of flower and vegetable seeds (value only, 1909). The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.

[7] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.

[8] Includes millet and Hungarian grass.

[9] The 1919 figures represent vegetables raised for sale only.

[10] In 1909 the value of the farm garden was largely included in the value of "other vegetables."

[11] These crops comprise maple sugar and sirup and ginseng.

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	2,292,119	2,277,116	2,317,742	1,648,443	1,298,310
Oats	173,317	197,449	280,115	288,332	166,513
Wheat	256,211	60,426	379,453	140,464	204,084
Rough rice	143,211	27,419	25	.....	.....
Hay and forage	[1] 1,002,333	441,698	239,426	138,290	25,749
Cotton	2,553,811	2,153,222	1,641,855	1,700,578	1,042,976

[1] Includes 147,376 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 854,957 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

CROP.	PER CENT OF IMPROVED LAND OCCUPIED. 1919	1909	AVERAGE YIELD PER ACRE. Unit.	1919	1909	AVERAGE VALUE PER ACRE. 1919	1909

LOUISIANA.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Louisiana collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1]	
			Amount.	Per cent.
Population, total	1,798,509	1,656,388	142,121	8.6
Rural [2]	1,170,346	1,159,872	10,474	0.9
Urban	628,163	496,516	131,647	26.5
Per cent rural	65.1	70.0		
Number of farms	135,463	120,546	14,917	12.4
Approximate land area of the state.....acres	29,061,760	29,061,760		
All land in farms.....acres	10,019,822	10,439,481	−419,659	−4.0

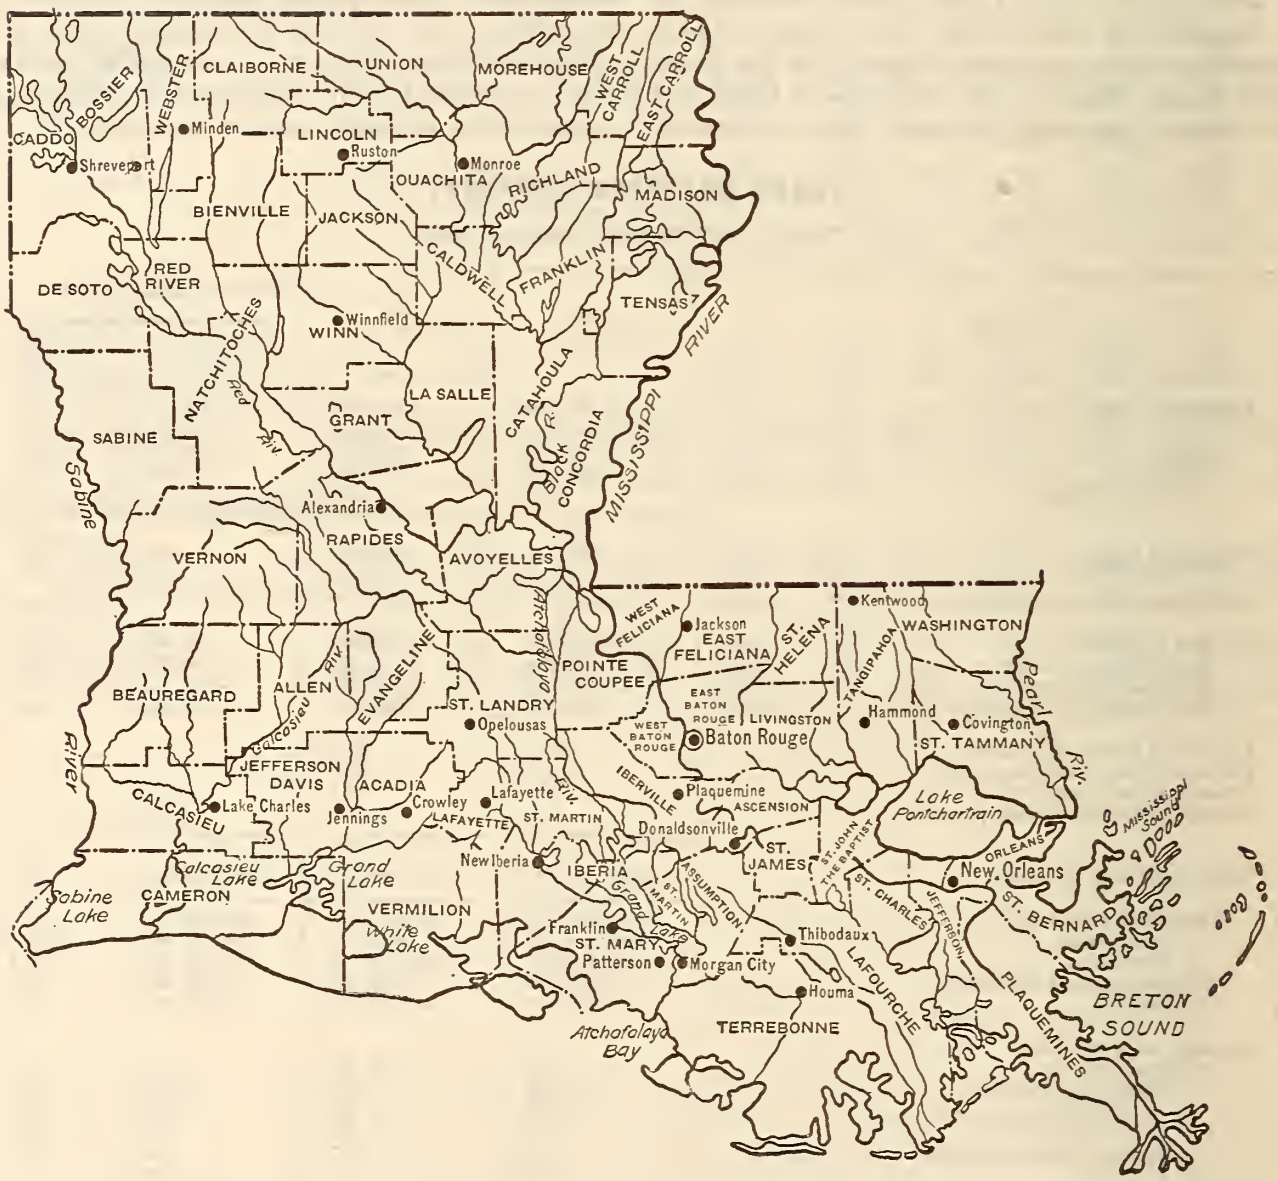
Woodland in farms.....acres	3,614,040	4,316,561	−702,521	−16.3
Other unimproved land in farms.....acres	779,556	846,904	−67,348	−8.0
Per cent of land area in farms	34.5	35.9		
Per cent of farm land improved	56.2	50.5		
Average acreage per farm	74.0	86.6	−12.6	−14.5
Average improved acreage per farm	41.5	43.8	−2.3	−5.3
Value of all farm property	$589,826,679	$301,220,988	$288,605,691	95.8
Land and buildings	474,038,793	237,544,450	236,494,343	99.6
Land alone	383,618,162	187,803,277	195,814,885	104.3
Buildings	90,420,631	49,741,173	40,679,458	81.8
Implements and machinery	32,715,010	18,977,053	13,737,957	72.4
Live stock	83,072,876	44,699,485	38,373,391	85.8
Average value per farm:				
All farm property	4,354	2,499	1,855	74.2
Land and buildings	3,499	1,971	1,528	77.5
Land alone	2,832	1,558	1,274	81.8
Buildings	667	413	254	61.5
Implements and machinery	242	157	85	54.1
Live stock	613	371	242	65.2
Average value per acre of land in farms:				
All farm property	58.87	28.85	30.02	104.1
Land and buildings	47.31	22.75	24.56	108.0
Land alone	38.29	17.99	20.30	112.8
Buildings	9.02	4.76	4.26	89.5
Implements and machinery	3.27	1.82	1.45	79.7
Live stock	8.29	4.28	4.01	93.7

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,127,515. For this territory, the increase in population between 1910 and 1920 was 3.8 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

LOUISIANA

PARISHES, PRINCIPAL CITIES, AND RIVERS.



EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

TABLE 2.—NUMBER OF FARMS AND FARM ACREAGE: 1850 TO 1920.

Chinese	.....	2	.....	.....	.....

[1] Includes farmers with country of birth not reported, as follows: For 1920, 1,983; for 1910, 111.
[2] Included with "other countries."

TABLE 17.—NUMBER OF FARMERS, CLASSIFIED BY TENURE, COLOR, AND NATIVITY: 1920 AND 1910.

TENURE.	ALL FARMERS.		NATIVE WHITE.[1]		FOREIGN-BORN WHITE.		COLORED.	
	1920	1910	1920	1910	1920	1910	1920	1910
Total	135,463	120,546	71,081	63,236	2,323	2,431	62,059	54,879
Owners	57,254	52,989	44,727	40,815	1,541	1,439	10,986	10,725
Managers	828	950	721	834	15	39	92	77
Tenants	77,381	66,607	25,633	21,587	767	943	50,981	44,077

[1] Includes farmers with country of birth not reported.

FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total	57,254	52,989	4,265	8.0	100.0	100.0
Free from mortgage	36,010	42,011	−6,001	−14.3	62.9	79.3
Mortgaged	11,783	9,834	1,949	19.8	20.6	18.6
Unknown	9,461	1,144	8,317	727.0	16.5	2.2

[1] A minus sign (−) denotes decrease. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890
Total	57,254	52,989	47,393	35,458	100.0	100.0	100.0	100.0
Free from mortgage	36,010	42,011	36,637	34,038	62.9	79.3	77.3	96.0
Mortgaged	11,783	9,834	7,878	1,420	20.6	18.6	16.6	4.0
Unknown	9,461	1,144	2,878	.....	16.5	2.2	6.1	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	10,301	7,520	2,781	37.0
Value of land and buildings	$68,361,653	$28,771,635	$39,590,018	137.6
Amount of mortgage debt	$20,490,966	$8,950,301	$11,540,665	128.9
Ratio of debt to value, per cent	30.0	31.1	.....	.....
Average rate of interest paid, per cent	7.2	.....	.....	.....
Average value per farm	$6,636	$3,826	$2,810	73.4
Average debt per farm	$1,989	$1,190	$799	67.1
Average equity per farm	$4,647	$2,636	$2,011	76.3

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures, it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Louisiana the number of "dairy cows," including heifers 1 year old and over, reported for January 1,

1920, was 217,690, as compared with 279,097 "cows kept for milk" reported for April 15, 1910. This represents a decrease of 61,407, or 22 per cent. The number of "beef cows" reported for January 1, 1920, was 316,518, as compared with 183,550 "cows not kept for milk" reported for April 15, 1910, representing an increase of 132,968, or 72.4 per cent. The large increase shown for beef cows is partly the result of the change in classification mentioned above, which also accounts in part for the decrease shown for dairy cows.

Farms reporting domestic animals: 1910.—Horses were reported by 79,565 farms in Louisiana in 1910, mules by 51,668 farms, cattle by 85,355, sheep by 3,656, and swine by 86,568. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Louisiana increased from 120,546 in 1910 to 135,463 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

CLASS.	FARMS REPORTING.		ANIMALS.		
	Number.	Per cent of all farms.	Number.	Value.	Average value.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production, and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.
Dairy cows on farms Jan. 1, 1920, total	56,544	41.7	176,936	Head

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Louisiana in 1919 for which the acreage was reported was 3,923,925, which represents 69.7 per cent of the total improved land in farms (5,626,226 acres). The total crop acreage reported for 1909 was 3,585,619, or 68 per cent of the improved land in farms (5,276,016 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 11,591 acres of mature crops grazed or "hogged off" and 26,920 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

CROP.	FARMS REPORTING. Number. 1919	1909	Per cent of all farms. 1919	1909	ACRES HARVESTED. 1919	1909	Per cent of increase.[1]	PRODUCTION. Quantity. Unit.	1919	1909	Per cent of increase.[1]	Value. 1919	1909	Per cent of increase.[1]

Other fruits and nuts												1,827,422	714,269	155.8

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.

[2] Excluding 5,910 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.

[3] The 1909 figures include a small quantity of buckwheat.

[4] Less than one-tenth of 1 per cent.

[5] The 1909 figures include small quantities of flaxseed and sunflower seed. A considerable part of the acreage in soy beans, peas, and possibly some other crops, is probably a duplication of other crop acreage.

[6] The 1909 figures include small quantities of flower and vegetable seeds (value only) and timothy seed. The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.

[7] Corn cut for forage was not reported to any extent in 1909; hence no very close comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.

[8] Includes millet and Hungarian grass.

[9] The 1919 figures represent vegetables raised for sale only.

[10] In 1909 the value of the farm garden was largely included in the value of "other vegetables."

[11] These crops comprise hops, hemp, and chufas.

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	1,504,970	1,590,830	1,343,756	837,516	742,728
Oats	33,443	29,711	28,033	27,023	26,861
Rough rice	456,959	317,518	201,685	84,377	42,000
Hay and forage	[1]208,631	181,110	97,136	27,576	35,514
Sweet potatoes and yams	68,033	56,953	27,372	26,555	17,923
Cotton	1,343,334	957,011	1,376,254	1,270,154	864,787
Sugar cane	234,049	329,684	276,966	193,694	181,592

[1] Includes 5,910 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 202,721 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

Walnuts (Persian or English)	204	398	0.2	0.3	679	3,390

[1] Includes apricots and (for 1910) quinces and mulberries. Since these fruits were not specifically called for by the 1920 schedule, the returns for that year are somewhat incomplete.
[2] The 1910 figures include lemons, mandarins, pomegranates, and olives.
[3] Less than one-tenth of 1 per cent.
[4] The 1910 figures include almonds, and also black walnuts and several other varieties of nuts not called for by the 1920 schedule.

OKLAHOMA.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Oklahoma collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1890.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.	
			Amount.	Per cent.
Population, total	2,028,283	1,657,155	371,128	22.4
Rural [1]	1,488,803	1,337,000	151,803	11.4
Urban	539,480	320,155	219,325	68.5

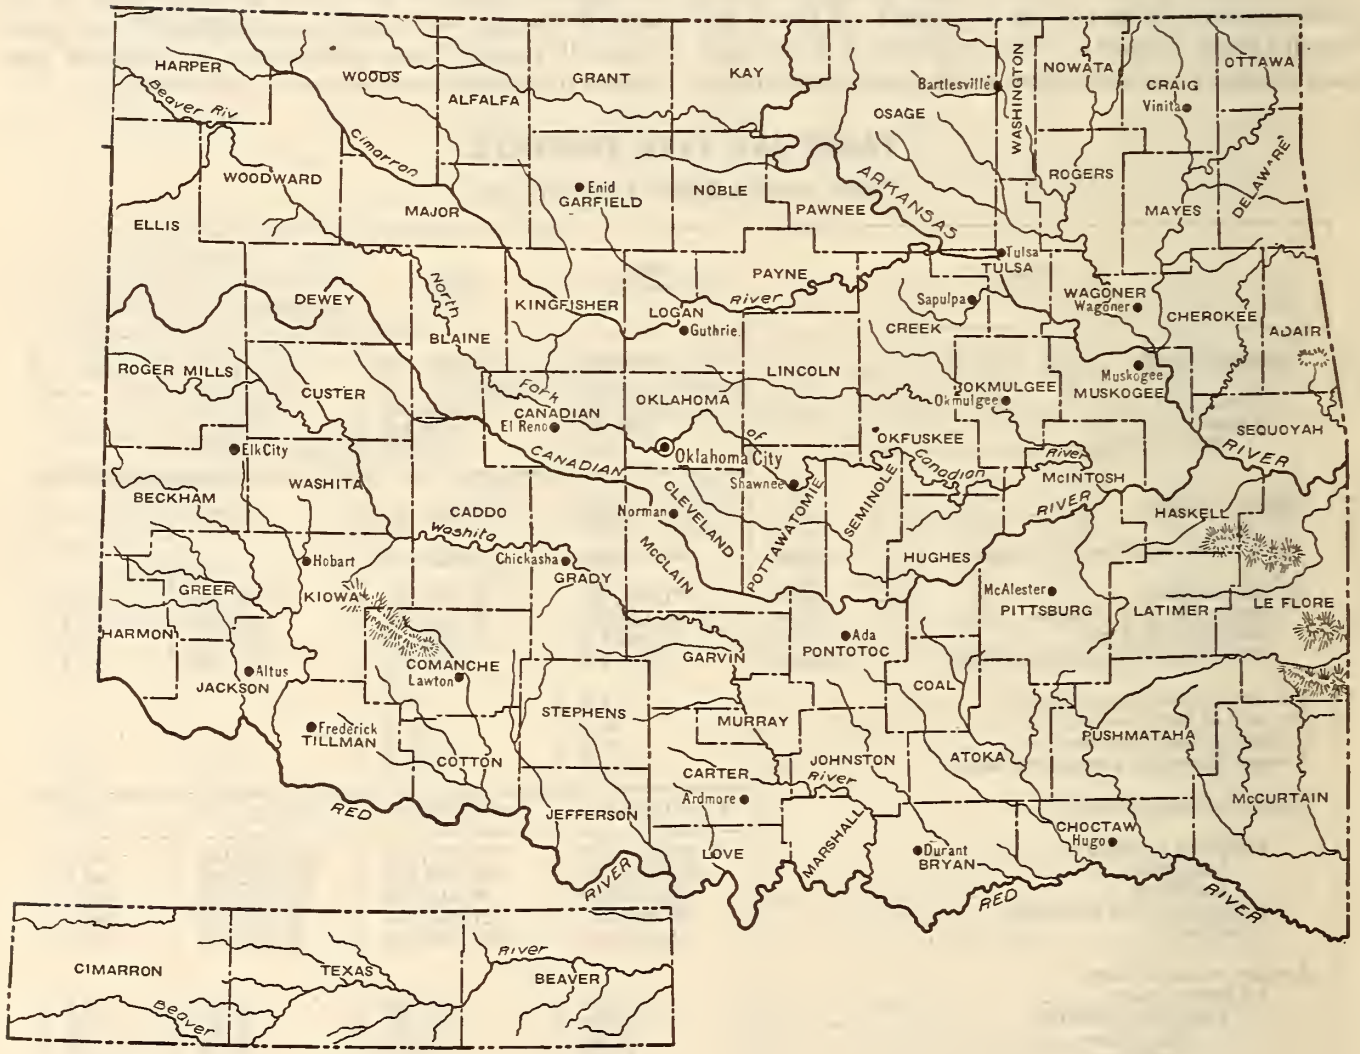
Live stock	215,927,703	152,432,792	63,494,911	41.7
Average value per farm:				
All farm property	8,649	4,828	3,821	79.1
Land and buildings	7,104	3,884	3,220	82.9
Land alone	6,102	3,413	2,689	78.8
Buildings	1,002	471	531	112.7
Implements and machinery	420	142	278	195.8
Live stock	1,125	801	324	40.4
Average value per acre of land in farms:				
All farm property	51.97	31.82	20.15	63.3
Land and buildings	42.68	25.60	17.08	66.7
Land alone	36.66	22.49	14.17	63.0
Buildings	6.02	3.11	2.91	93.6
Implements and machinery	2.52	0.94	1.58	168.1
Live stock	6.76	5.28	1.48	28.0

[1] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,317,870. For this territory, the increase in population between 1910 and 1920 was 13.0 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

OKLAHOMA

Counties, Principal Cities, Rivers, and Mountains.



EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

TABLE 2.—NUMBER OF FARMS AND FARM ACREAGE: 1890 TO 1920.

CENSUS YEAR.	FARMS.		LAND IN FARMS.

Free from mortgage	30,551	46,889	50,676	9,903	32.8	54.9	82.6	100.0
Mortgaged	47,025	36,036	5,073	.....	50.4	42.2	8.4	.....
Unknown	15,641	2,479	5,486	.....	16.8	2.9	9.0	.....

[1] Includes Indian Territory. [2] Figures for Indian Territory.

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	34,045	24,588	9,457	38.5
Value of land and buildings	$272,615,622	$122,327,300	$150,288,322	122.9
Amount of mortgage debt	$73,434,422	$27,384,765	$46,049,657	168.2
Ratio of debt to value, per cent	26.9	22.4	.....	.....
Average rate of interest paid, per cent.	6.6	.....	.....	.....
Average value per farm	$8,008	$4,975	$3,033	61.0
Average debt per farm	$2,157	$1,114	$1,043	93.6
Average equity per farm	$5,851	$3,861	$1,990	51.5

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures, it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909
Labor	102,674	73,126	29,548	40.4	53.5	38.4
Fertilizer	2,445	622	1,823	293.1	1.3	0.3
Feed	114,488	62,546	51,942	83.0	59.6	32.9

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE.	
	1919	1909	Amount.	Per cent.[1]
Labor, total	$40,615,418	$9,837,541	$30,777,877	312.9
Amount in cash	35,333,151	7,963,617	27,369,534	343.7
Value of rent and board furnished	5,282,267	1,873,924	3,408,343	181.9
Fertilizer	452,492	29,092	423,400	.....
Feed	30,372,146	5,863,373	24,508,773	418.0

[1] Per cent not shown when more than 1,000.

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Oklahoma the number of "dairy cows," including heifers 1 year old and over, reported for January 1, 1920, was 560,119, as compared with 530,796 "cows

kept for milk" reported for April 15, 1910. This represents an increase of 29,323, or 5.5 per cent. The number of "beef cows" reported for January 1, 1920, was 648,031, as compared with 304,165 "cows not kept for milk" reported for April 15, 1910, representing an increase of 343,866, or 113.1 per cent. The percentage of increase in the number of beef cows would have been considerably smaller, except for the change in classification mentioned above, and the increase in the number of dairy cows somewhat larger.

Farms reporting domestic animals: 1910.—Horses were reported by 163,204 farms in Oklahoma in 1910, mules by 90,488 farms, cattle by 156,842, sheep by 880, and swine by 135,741. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Oklahoma increased from 190,192 in 1910 to 191,988 in 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Oklahoma in 1919 for which the acreage was reported was 15,132,111, which represents 83.5 per cent of the total improved land in farms (18,125,321 acres). The total crop acreage reported for 1909 was 11,920,773, or 67.9 per cent of the improved land in farms (17,551,337 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 83,416 acres of mature crops grazed or "hogged off" and 110 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

CROP.	FARMS REPORTING. Number. 1919	1909	Per cent of all farms. 1919	1909	ACRES HARVESTED. 1919	1909	Per cent of increase.[1]	PRODUCTION. Quantity. Unit.	1919	1909	Per cent of increase.[1]	Value. 1919	1909	Per cent of increase.[1]
All crops												$550,084,742	$131,522,220	318.2

Other fruits and nuts												9,029,194	1,127,710	700.7

[1] A minus sign (−) denotes decrease. Per cent not shown when more than 1,000.
[2] Excluding 73,179 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.
[3] The 1909 figures include a small quantity of buckwheat.
[4] Less than one-tenth of 1 per cent.
[5] Principally oats and barley grown and harvested together.
[6] Includes small quantities of broom-corn seed and sunflower seed (1919 and 1909), and of castor beans (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops, is probably a duplication of other crop acreage.
[7] The 1909 figures include small quantities of flower and vegetable seeds (value only) and of timothy seed. The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.
[8] Corn cut for forage was not reported to any extent in 1909; hence no close comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.
[9] Includes millet and Hungarian grass.
[10] The 1919 figures represent vegetables raised for sale only.
[11] In 1909 the value of the farm garden was largely included in the value of "other vegetables."
[12] These crops comprise sugar cane and hemp.

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1889 TO 1919.

CROP.	1919	1909	1899[1]	1889[2]
Corn	2,472,905	5,914,069	2,501,945	13,307
Oats	1,573,055	609,373	317,076	4,446

Broom corn	232,733	216,350	12,763	59

[1] Includes Indian Territory.
[2] Figures for Indian Territory. No data prior to 1889.
[3] Includes 73,179 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 2,000,334 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

[1] Includes apricots and quinces. Since these fruits were not specifically called for by the 1920 schedule, the returns for that year are somewhat incomplete.
[2] Less than one-tenth of 1 per cent.
[3] The figures for 1910 and 1909 include almonds and Persian or English walnuts, and also black walnuts and several other varieties of nuts not called for by the 1920 schedule.

COUNTY TABLE I.—FARMS AND FARM PROPERTY, 1920,

[The 1900 totals are for Oklahoma and Indian Territory combined. The changes in county boundaries between 1900

TEXAS.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Texas collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE.[1] Amount.	INCREASE.[1] Per cent.
Population, total	4,663,228	3,896,542	766,686	19.7

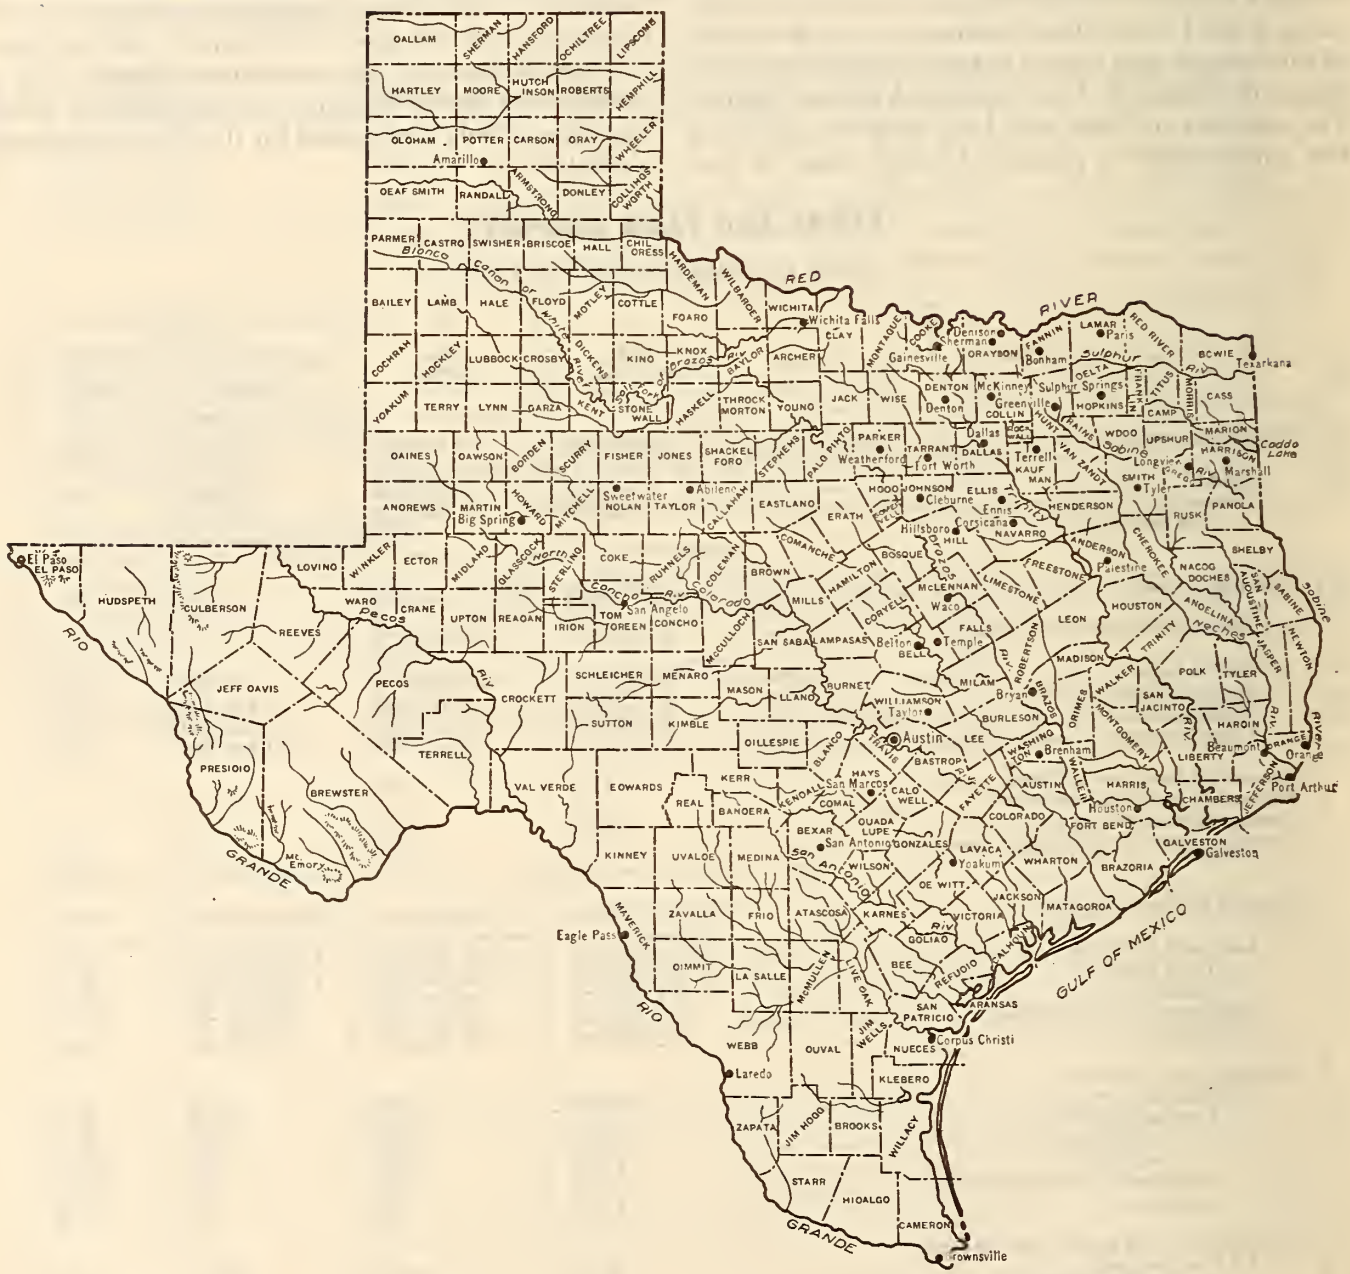
Buildings	3.99	1.87	2.12	113.4
Implements and machinery	1.35	0.51	0.84	164.7
Live stock	5.20	2.83	2.37	83.7

[1] A minus sign (−) denotes decrease.

[2] Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 2,902,044. For this territory, the increase in population between 1910 and 1920 was 8.6 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

TEXAS

Counties, Principal Cities, Rivers, and Mountains.



EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least $250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as $7 per acre of crop land or $500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

NUMBER OF FARMS, ACREAGE, AND VALUE.

FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total	**201,210**	**195,863**	**5,347**	**2.7**	**100.0**	**100.0**
Free from mortgage	105,490	128,082	−22,592	−17.6	52.4	65.4
Mortgaged	69,940	64,008	5,932	9.3	34.8	32.7
Unknown	25,780	3,773	22,007	583.3	12.8	1.9

[1] A minus sign (−) denotes decrease. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890

Free from mortgage	105,490	128,082	125,504	119,093	52.4	65.4	73.0	94.3
Mortgaged	69,940	64,008	38,408	7,221	34.8	32.7	22.3	5.7
Unknown	25,780	3,773	8,063	.....	12.8	1.9	4.7	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED.[1]		INCREASE.	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt	57,700	48,024	9,676	20.1
Value of land and buildings	$664,522,579	$297,880,832	$366,641,747	123.1
Amount of mortgage debt	$172,166,818	$76,089,272	$96,077,546	126.3
Ratio of debt to value, per cent	25.9	25.5	.....	.....
Average rate of interest paid, per cent.	7.3	.....	.....	.....
Average value per farm	$11,517	$6,203	$5,314	85.7
Average debt per farm	$2,984	$1,584	$1,400	88.4
Average equity per farm	$8,533	$4,619	$3,914	84.7

[1] Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures, it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.

FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE.		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909
Labor	190,434	160,538	29,896	18.6	43.7	38.4
Fertilizer	27,459	15,931	11,528	72.4	6.3	3.8
Feed	215,581	112,866	102,715	91.0	49.4	27.0

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE.	
	1919	1909	Amount.	Per cent.
Labor, total	$87,745,291	$25,784,501	$61,960,790	240.3
Amount in cash	80,315,281	22,653,397	57,661,884	254.5
Value of rent and board furnished	7,430,010	3,131,104	4,298,906	137.3
Fertilizer	1,831,207	595,363	1,235,844	207.6
Feed	60,762,084	10,800,046	49,962,038	462.6

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers *not* kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Texas the number of "dairy cows," including heifers 1 year old and over, reported for January 1,

1920, was 1,001,715, as compared with 1,013,867 "cows kept for milk" reported for April 15, 1910. This represents a decrease of 12,152, or 1.2 per cent. The number of "beef cows" reported for January 1, 1920, was 2,581,701, as compared with 2,469,321 "cows not kept for milk" reported for April 15, 1910, reprcsenting an increase of 112,380, or 4.6 per cent.

Farms reporting domestic animals: 1910.—Horses were reported by 319,207 farms in Texas in 1910, mules by 242,578 farms, cattle by 336,707, sheep by 6,876, and swine by 293,586. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Texas increased from 417,770 in 1910 to 436,033 in 1920.

TABLE 23.—DOMESTIC ANIMALS ON FARMS: 1920.

CLASS.	FARMS REPORTING.		ANIMALS.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

TABLE 28.—DAIRY COWS ON FARMS, 1920; AND DAIRY PRODUCTS, 1919 AND 1909.

ITEM.	FARMS REPORTING. Number.	FARMS REPORTING. Per cent of all farms.	Number or quantity.	Unit.	Value.

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Texas in 1919 for which the acreage was reported was 25,027,773, which represents 80.1 per cent of the total improved land in farms (31,227,503 acres). The total crop acreage reported for 1909 was 18,384,910, or 67.2 per cent of the improved land in farms (27,360,666 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 129,532 acres of mature crops grazed or "hogged off" and 4,101 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of livestock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

[1] A minus sign (−) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.
[2] Excluding 118,710 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.
[3] Includes a small quantity of buckwheat.
[4] Less than one-tenth of 1 per cent.
[5] Principally wheat and oats grown and harvested together.
[6] Includes small quantities of sunflower seed (1919 and 1909) and of flaxseed and broom-corn seed (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops is probably a duplication of other crop acreage.
[7] Includes small quantities of timothy seed (1919 and 1909) and of flower and vegetable seeds (value only, 1909). The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.
[8] Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.
[9] Includes millet and Hungarian grass.
[10] The 1919 figures represent vegetables raised for sale only.
[11] In 1909 the value of the farm garden was largely included in the value of "other vegetables."
[12] These crops comprise hops (1919) and willows and chufas (1909).

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn	4,748,655	5,130,052	5,017,690	3,079,907	2,468,587
Oats	1,862,933	440,001	847,225	528,924	238,010
Wheat	2,414,903	326,176	1,027,947	352,477	373,570

Rough rice	164,481	237,586	8,711	178	335
Peanuts	165,407	64,327	10,734		
Hay and forage	[1] 2,390,457	1,357,112	938,024	377,523	58,033
Cotton	11,522,537	9,930,179	6,960,367	3,934,525	2,178,435

[1] Includes 118,710 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 2,271,747 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

CROP.	PER CENT OF IMPROVED LAND OCCUPIED. 1919	1909	AVERAGE YIELD PER ACRE. Unit.	1919	1909	AVERAGE VALUE PER ACRE. 1919	1909

[1] Includes apricots and (for 1910) quinces and mulberries. Since these fruits were not called for by the 1920 schedule, the returns for that year are somewhat incomplete.
[2] The figures for 1910 and 1909 include bananas, pomegranates, and pineapples (trees or plants and value of product).
[3] Less than one-tenth of 1 per cent.
[4] The figures for 1910 and 1909 include black walnuts and several other varieties of nuts not called for by the 1920 schedule.

[2] The excess of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated as in the county where the operator lives, even though a part of the farm may be situated in an adjoining county.

COUNTY TABLE I.—FARMS AND FARM PROPERTY, 1920,

		Brazoria.	Brazos.	Brewster.	Briscoe.	Brooks.[1]	Brown.	Burleson.	Burnet.

[1] The excess of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated as in the county where the operator lives, even though a part of the farm may be situated in an adjoining county.

COUNTY TABLE I.—FARMS AND FARM PROPERTY, 1920.

[5] The excess of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated as in the county where the operator lives even though a part of the farm may be situated in an adjoining county.

[6] Less than one-tenth of 1 per cent.

COUNTY TABLE I.—FARMS AND FARM PROPERTY, 1920,

[1] The excess of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated as in the county where the operator lives, even though a part of the farm may be situated in an adjoining county.

[4] Real County organized from parts of Bandera, Edwards, and Kerr Counties in 1913.

[5] The excess of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated as in the county where the operator lives, even though a part of the farm may be situated in an adjoining county.

COUNTY TABLE I.—FARMS AND FARM PROPERTY, 1920,

		Runnels.	Rusk.	Sabine.	San Augustine.	San Jacinto.	San Patricio.	San Saba.	Schleicher.	Scurry.

[3] The excess of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated as in the county where the operator lives, even though a part of the farm may be situated in an adjoining county.

COUNTY TABLE I.—FARMS AND FARM PROPERTY, 1920, WITH SELECTED ITEMS FOR 1910 AND 1900—Continued.
